SESAME CROP SUMMARY

PRODUCTION OF SESAME

- Tanzania rank number four among top 10 sesame producers in the world (FAOSTAT,2022).
- For the year 2020 Tanzania exported Sesame about 540,000 tonnes
- For this year 2022, till Aug 15, Tanzania has exported more than 52,000 tonnes (warehouse receipt system)
- These produce are from two giant sesame producer regions (Lindi and Mtwara).
- Little sesame seeds (0.25% from produced sesame) are consumed locally and others are saved as seeds for other cropping season.
- Sesame market is through Warehouse receipt system and contract farming

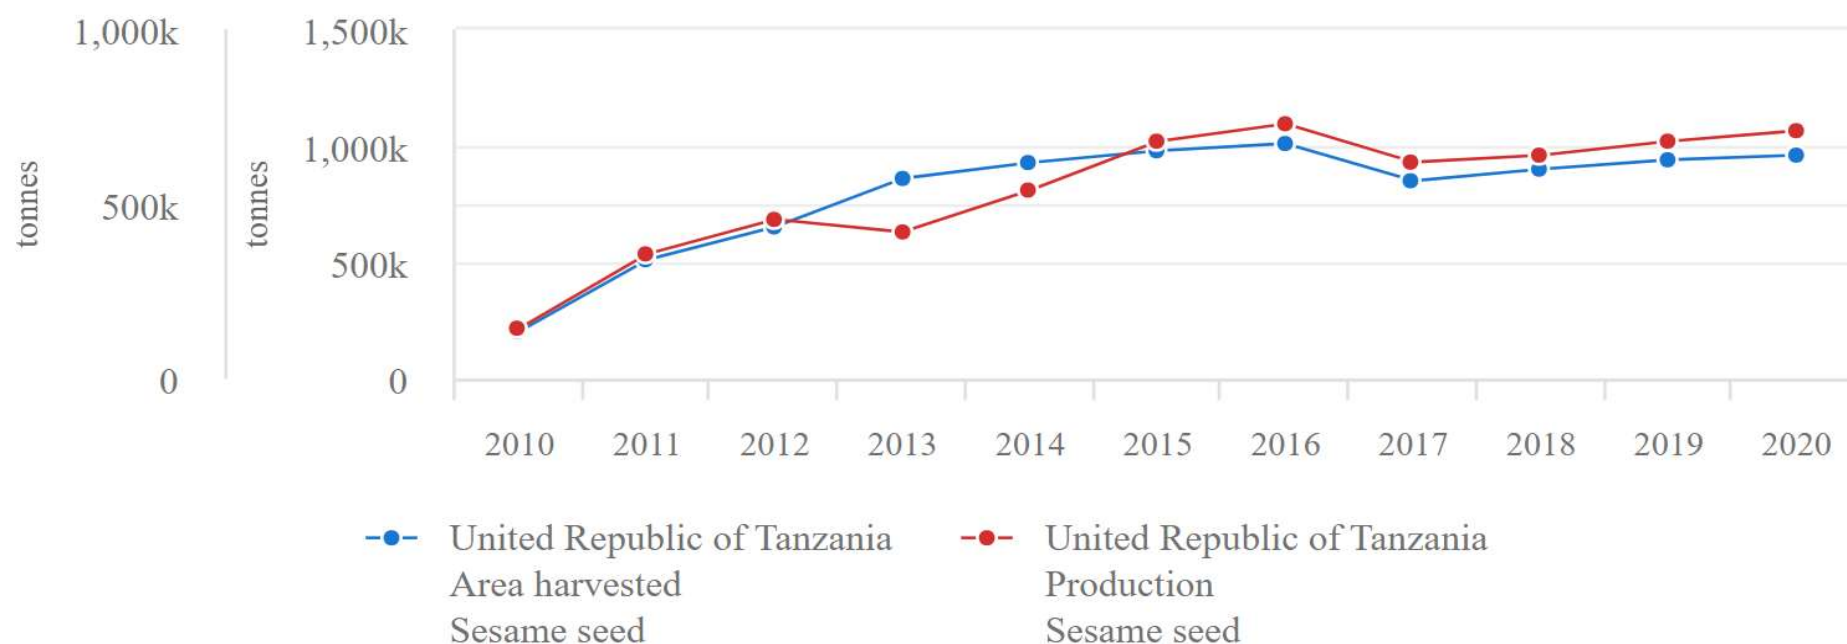

CROP SUMMARY contd.....

Production/Yield quantities of Sesame seed in United Republic of Tanzania

2010 - 2020

Source: FAOSTAT (Aug 12, 2022)

2022 SESAME CROP STATUS

- The expected land for sesame production were 799,000 ha
- Expected sesame production were 1,198,500 tonnes
- The southern part of Tanzania (Lindi and Mtwara regions) accounts 70% of the sesame production
- The expected production from these regions were 838,950 tonnes
- However the actual production in this year 2022 for this big producers regions is less than 70,000tonnes
- Up to 08th August 2022 Lindi and Mtwara has exported 52, 000 tonnes.

2022 SESAME CROP STATUS cont..

- The expected land for sesame production were 799,000 ha
- Expected sesame production were 1,198,500 tonnes
- 70% of the land for sesame production is located in southern part of Tanzania (Lindi and Mtwara regions)
- The expected production from these regions were 838,950 tonnes
- However the actual production in this year 2022 for this big producers regions is less than 70,000 tonnes
- Up to 08th August 2022 Lindi and Mtwara has exported 52, 000 tonnes

Sesame plants

seed colour type

SESAME CROP STATUS contd..

Challenges facing Sesame production in Tanzania in 2022

- **Major challenges**

- Un predictable market price (effect of COVID-19)
- lack of funds/sponsors who can contribute to research and extension services.
- Sesame insect pest (Flea beetle)
- Insufficient of friendly technology for sesame seed planting

- **Minor challenges**

- Unreliable rainfall, poor agronomic practices, and sesame diseases

OPPORTUNITIES AVAILABLE IN TANZANIA

- Availability of suitable land for sesame farming
- Availability of strong Sesame Research Program ready to collaborate with investors/sponsors
- Good Policy for investors
- Peace country
- Willingness of farmers and leadership
- Availability of improved sesame seeds

2022 SESAME CROP AND PRICE EXPECTATION

QUALITY OF CROP: The quality is standard because of the maximum use of improved sesame varieties, most cultivated sesame seeds are white in colour with >50% oil content

SIZE OF CROP: not more than 700,000 tonnes

PRICE EXPECTATION (FOB BASIS IN USD/TONNE)

Price expectation should be **more than USD 1600 /tonne**

- due high price of agricultural input and cost of production

LOGISTICS, CURRENCY AND SHIPPING

Procedures

- The exporter should apply for phytosanitary certificate from TPHPA
- The exporter intending to export Sesame seeds should apply for plant export permit to the Ministry of Agriculture
- The Exporter must apply for Health certificate from TFDA if needed by the exporting country.
- Inputs for the Exportation in Sesame Company Registration Certificate from BRELA
- TIN Certificate and Tax Clearance Letter from TRA
- Valid Business License from BRELA
- Certificate of origin from TCCIA
- Import permit from the importing country
- Pro-forma Invoice
- Packing List & Phytosanitary Certificate
- For shipping, the exporter may use Agents (Clearing and Forwarding Agents) who will handle most all procedure concerning shipping.

EXPECTATIONS FROM BUYERS

- Good sustainable market **price more than US\$ 1600/tonne**
 - Sesame **quality standards** from both buyers and consumers.
 - **Quantity of sesame** required
 - Buyers preferences
-
- **These should be well known before planting**
 - **Will influence more farmers to produce sesame**

THANK YOU

GOD BLESS US ALL
